Attention: Dr. Gwen Theron

AMENDED FINAL SCOPING REPORT: CLAYVILLE EXT.55

(GAUT: 002/14-15/0097)

Your report dated 24 March 2015 refers.

The proposed township falls within the Ekurhuleni Metropolitan Local Council's jurisdiction, this Department can therefore not comment on any By-Laws, IDP's, RSDF's, policies or precinct plans for the area.

The proposed development will take place in close proximity of the Glen Austin Bird Sanctuary which is a proclaimed sanctuary. This is a known site for the Giant Bullfrog.

A specialist in Herpetology should conduct a Giant Bullfrog Survey and habitat assessment which should be included in a management plan for the area and included in the EMP.

Should you have any queries please do not hesitate to contact Etienne Allers on the numbers indicated above.

Yours faithfully

MASHUDU RATSHITANGA
SUB HEAD: ENVIRONMENTAL IMPACT MANAGEMENT

Tel: (011) 587 4225
Fax: 0866277516

Dear Both

On reading through the information sent, nowhere have you stated that I can see is what is envisaged for the site ie how many houses, what sort, other infrastructure.

You mention the Ward Councillor and refer to 'she'. Our Ward Councillor is male.

We need a full report on both plots asap on what is envisaged for the site as you cannot expect residents to comment when they do not know what Mr Strydom proposes for the site.

Regards

Subject: Strijdom Farm

Follow Up Flag: Follow up
Flag Status: Flagged

Good Morning Jitske,

thanks for reports info for the development on Strijdomfarm (Olifantsfontein), but I have spoken to others – they also can't open dropbox – guess, our providers (Vodacom for example) out here are far too slow in transmission!

Important:

Further North on the Farm next to the "legal" dumpsite from Interwaste a huge area (right into the wetland)

has been filled with building rubble – the area is surrounded by sticks with some wires quickly pulled around and declared as 'bought property' from Strijdom – buyer: SA Demolisher. We asked for re-zoning plans and EIR but they say, we bought it and according to them it is in process (never!) and they rent now from Strijdom.....but nobody gave them permission to dump on a wetland, or?

Well, we guess it is a huge scam to get rid of the wetland – good reason for this thinking is

- they dump only at night and some vagrants are since then busy to burn the cables (toxic smell in the air at night) besides that the rain now comes and all the toxic like asbestos etc. are in the groundwater.
- no SA demolisher is driving – these are so-called subcontractors from SA Demolisher and SA Demolisher said: We have nothing to do with it....

....just interesting enough to show what happens a little bit further down where all the development should go on..... and with a bit gut feeling one can point out the real culprits....

On Friday Miyelani from GDARD was here for investigation and what he needs now is the address and contacts for the Strijdom Family Trust – **can you provide me urgently with it?** Thanks – it would be very helpful as we have to do something against this.

Have a wonderful week,
Elisabeth Hinke

Hi Christine

I hope you are well.

The I&AP's can contact me and I will e-mail the reports to them.

Also a hard copy of the reports were sent to you. So they can come and have a look at the reports at your offices.

I will send out a e-mail to registered I&AP's to inform them that they can view a copy with you. Please indicate where they should come to view the reports.

Kind regards
Jitske

Subject: Portions 183 and 207 Olifantsfontein - Valumax - Draft Scoping Report

Follow Up Flag: Follow up
Flag Status: Flagged

Dear sir,

In connection with the above draft report I comment as follows:

Although the properties are situated in Ekurhuleni the spatial development plans that apply in the area adjacent need to be taken into account. These plans are the Glen Austin Spatial Development Plan and the Johannesburg development plans that may apply. The GASDP represent the thinking of the residents of Glen Austin and must be taken into account.

The thinking that was expressed at the time the R109 was routed was the route would not pass between the two main water bodies that make up the Glen Austin Pan complex. This meant that the route would be move eastward to incorporate the East pan and then be aligned parallel to van Riebeeck Road a distance that equalled the depth of the plots East of van Riebeeck and South of Olifantsfontein. The space thus defined namely van Riebeeck on the West and the 109 on the east could possibly become urban agriculture, or grazing. The area defined by the route of the R109 East of the East pan could become a conservation area of the two pans in a holistic and meaningful way. I may add that at the time that the GASDP was formulated with the Jo'burg Planning I was the chairman of the Glen Austin Residents Association (GARA).

If it can't be reduced, reused, repaired, rebuilt, refurbished,refinished,resold, recycled or compacted, then it should be restricted redesigned or removed from production.
Pete Seeger

Regards
Jan van Kroonenburg

27 October 2014

Scoping document comment- Portion 207 Olifantsfontein

Location

Should the development not be located closer to Tembisa/ Olifantsfontein where there is an established infrastructure and work opportunities?

Kindly advise to which work opportunities the report is referring in para 5.1.

Road access

Key portions of the Old Pretoria road – k101, Allan Road, Dale Road, Olifantsfontein road, have remained unchanged for decades. Congestion / delays, relative to the traffic volume, are unacceptable, before even considering yet further increases in traffic. A key feeder – George road, remains partially untarred after many years and is a disturbing example of where First World and Third world meet. A development behind the Eskom training centre has several thousand dwellings all with attendant transport needs – and **NO** change has been made to relieve traffic for these residents. From a traffic flow viewpoint, Johannesburg municipality really do believe that you can "fit a quart into a pint pot".

Environmental concerns

Extinction is forever – a statement of the obvious. The pan is a pristine wetland- one of the few remaining bullfrog breeding points on the Highveld. Any assurances, in this regard, should be seen in the light of the Fourways development area in earlier years - where no restitution of breeding facilities was undertaken (as far as we know). Equally important is the migration of the frogs. Currently, the construction of brick walls with no access points (in particular on the North and Western side of the pan, in Glen Austin), almost preclude their natural migration. There will be higher attrition levels when crossing and migrating along tar roads, than even at the present time. Current survival rate is only 1-2%.

Many of these concerns apply to avian breeding/ ongoing survival.

A buffer zone of 32metres / 1km for buildings, is no buffer zone at all – Bullfrogs migrate over kilometre distances. Kindly investigate this.

Devaluation of property values

On a national level, some 4m taxpayers currently support 16million people on grants. As government continues to hammer the broad middle base of tax/ ratepayers, so this equation becomes more untenable. Do not drive down property values and with it, drive out valuable ratepayers. A significantly smaller, lower density development of medium cost housing for a broader cross-section of the population, may be a more equitable compromise and earn the municipality more in the longer term.

Farming

Refer item 5.1 alternatives and motivation.

From: Bessit, Cedric [mailto:Cedric.Bessit@smec.com]
Sent: 27 October 2014 10:16 AM
To: Jitske
Subject: RE: Portion 207 Olifantsfontein - Valumax - Draft Scoping Report

No I have never been to the site until last week and the new link you send this morning link still requires password. I can receive large emails, if you can send.

Despite the negative reference to agricultural use, farming still forms the backbone of the economy in many parts of the country. Various examples of farming project are evident in the Glen Austin area and more ventures should be encouraged, not discouraged. It is a pre-requisite for any nation to feed its people. Refer farming ventures on Pitzer Road, Olifantsfontein Road, President Park (which includes a fish farm and vegetable production), Cresset House, etc. (photos to follow).

Enforcement of regulations

As plot owners, we are currently experiencing several glaring examples of the incompetence / impotence/integrity /disinterest /of the Johannesburg municipality to enforce their own regulations, opposite building development in Glen Austin. These have implications on the entire grading of Glen Austin as an "Agricultural Holding" area. For example, the industrial site on the corner of Belvedere and Douglas Roads to the immediate west of the pan – it is an aesthetic eyesore, which has no place in a residential area, but which has remained in situ for some 8 years. No EIA was conducted and there are ongoing concerns re potential spillage of chemicals/ contaminated effluent run off and noise pollution. (Specifics details available to any interested parties). It is hardly likely that the Municipality will have any greater commitment to proposed enforcement of environmental / other concerns in this new development.

Security

Reference has been made to short term security concerns during construction (7.4.2 of the scoping document). The development, as outlined, may have far greater long term security considerations, however, for the current and future residents. Security awareness peaks and troughs according to the latest incidents, but the problem is ever present (refer to latest Midrand reporter dated 23 Oct 2014). This is especially true, if low cost housing is erected and shacks built alongside these, for some who are unemployed or even unemployable. A drive past Diepsloot or the development in the vicinity on Allandale Road, east of Carstenhof Hospital, will illustrate the point.

In Conclusion

As committed Christians, we accept that we do not, in truth, own anything, but are custodians of God's creation. Nevertheless, we would like to be competent custodians, conserving what we can for future generations.

Many thanks

David and Christiene Morris

Jitske, Please see below extraction from comments by others, which I also agree with, specifically my issues are in relation to:

- controlling and monitoring of groundwater pollution considering most persons in the area depend on groundwater for animals. How will sewer collection and treatment and stormwater management be done for the development?
- entry and exit roads for traffic to and from the new development, considering existing Van Riebeeck is un-tarred. Has a traffic impact assessment been completed? Not to mention potential dust pollution, if this road is to be accessible.
- we are supplied directly by Eskom power meaning that although the development will be in Ekurhuleni as oppose to Johannesburg (where we reside) there may be significant additional loading on our existing cables.
- What is the minimum distance that residential development can be done to an existing and operational landfill site? Is there some degree of screening required?

ANNEXURE A.

COMMENTS ON THE DEVELOPMENT ON STRYDOOMS FARM

1. No development should take place within 1 km radius of the Glen Austin Pan.
2. Dale Road, Allen Road and Modderfontein Roads to be upgraded and widened.
3. There will be a marked Devaluation of properties on the East side of Glen Austin.
4. The GA Pan could be destroyed with pollution from the development.
Once it is gone, it is gone forever.
5. Once RDP houses are built, there is no control and shacks get attached to them for renting out. Litter, Overpopulation will become a problem. Noise will be a problem.
6. What type of roads will be built within the development to cater for this huge development?
And where will the access points be?
Will power cables be over head or underground.
7. Please provide detailed development plans.
8. More information required about the Developer.
10. Who is the backer – last time it was Nedbank.
11. Who now owns the land?
12. Impact of dust and noise during the development.
13. Lots of concrete and roads and where will the water drain to.
14. Contamination of boreholes.
15. Roads planned for over the wetland and underground fountains will have to be on stilts.
16. Wetland delineation should be done and buffer zones should be established around the wetlands.
17. Groundwater impacts.
18. The impact of sewerage on water is of concern – residents in some instances have boreholes only.
19. Preservation of the Bull Frog.
20. Preservation of Grass Owls.
21. Flamingos and other birds visit the pan during the summer – a development will stop this.
22. Protection of indigenous flora and fauna.
23. Protection of snakes – a rare snake was released there recently.
24. Dolomite study should be done.
25. Traffic congestion will be increased for Midrand.
26. Who is going to monitor and prevent Crime during construction?
27. Power supply already under pressure, the impact on power provision should be considered
28. Where will the sewerage works be.
29. The specialist studies should be done by an independent party.
30. Broaden the public awareness process.
31. The developer should be present at meetings.
32. Consultation should be done with Caroline Yetman – Bullfrog specialist – and Paul Farrell – wetland specialist.
33. What type of walling will be erected around the entire proposed development?

Riebesek Road
Glen Austin
Midrand
Email: carkrog@gmail.com

Comments as follows:

- 1) Conservation issues - Frogs, Fauna & Flora etc.
- 2) Development of this nature even if management of surrounding ecological areas is put in place, they are never managed after the development is handed over. The people occupying this sort of development do not take into consideration any conservation boundaries etc. Rubbish dumped anywhere, shacks and informal housing rises up all over the place, informal business on the side of the streets and to the entrance of these developments. Increased traffic with taxis and motor vehicles parked all over the show at the entrances to these developments. Something that clearly will affect the ecological, tranquility and surrounding area of Glen Austin.
- 3) Over population - people move in over and above what the development caters for.
- 4) Water table that will be affected by pollution etc. Taking away of vegetation that assists our table. The residents use boreholes for irrigation and drinking water.
- 5) Power and its implementation.
- 6) Our lifestyle in the area will change completely. We live in Glen Austin for its tranquility, where we can enjoy our horses and animals etc.
- 7) Crime will definitely rise!
- 8) Value of our properties will decline to Zero, loss of investment and lifestyle.
- 9) Depredation of surrounding properties.

I suggest the following clearly takes precedent in the EIA process:

- 1) Proper investigation into market value of existing properties
- 2) The study of present developments of this nature which will clearly indicate that a development of this nature cannot be built in the designated area!
- 3) Alternative areas needed to be looked at!
- 4) The developers main concern be financial
- 5) Developer is to appoint the persons required for the necessary studies but chosen by an independent party.
- 6) I as a resident of Glen Austin am clearly against the development of the area due to the concerns of the total ruination of the designated ecological areas once development handed over. Other developments of this nature have shown this.
- 7) The environmental impact assessment done in 2009 is referred to.

4

Annexure A

Addition to Public Participation Process

JHC Sasser / Sasser Family Trust

My comments regarding the proposed school on Eagles Nest K12

- Access to the school via the service road off R82
- Environmental impact considering the area neighbours a green belt area
- Electricity supply issues – the whole area is currently under severe electric strain with constant power interruptions due to poor infrastructure in our area
- Water supply – water in the area comes 18km far from Mondor connections – we have a constant issue with water pressure
- Sewerage – there is no sewerage and the whole school would have to run on septic tanks – that is extremely impractical for a school
- Potential traffic disaster – we have 60 units in Eagles nest estate and this already causes traffic issues in the mornings and evenings. Additional traffic in and out of the main road will most definitely start causing accidents. It is not possible to put a robot on the intersection as there is a robot less than a kilometre down the R82. Another robot will cause unnecessary pressure on an already busy road.

Dear Sirs

There seems to be some impact studies still outstanding.

The main issue is the impact these low cost housing development has on the community to the west of proposed development. The developers are only interested in their own pockets. I have seen developments of this nature turn into shanty towns allowing uncontrolled building of additional rooms on very small properties for rental. The development mushrooms 4 to six times the size it should be catering for. The surrounding area is largely affected with increased crime, uncontrolled pollution and traffic way beyond what the environment can cope with. This will lead to the pollution of our water tables in the area and our pans etc. No mention has been made as to what will be put in place to assure that the community of Glen Austin will be protected and its own environment remain intact. Our spatial development plan saw to it that the K109 would run through Strydom farm and not on Van Riebeeck Rd. Thus creating an agricultural barrier and Bird sanctuary which in turn will protect the pan. Glen Austin needs to remain separate from any development in the area and the developers should come up with the necessary plans to do so. This should take place before any development could go ahead. Closing off Glen Austin on the western side above Van Riebeeck Road and the pan – take a look at the spatial development plans for the area. Our concerns for our life style should also be addressed without us standing in the way of housing for others. I hope that all parties concerned can find a way to work together.

Regards
Henry Krog
43 Van Riebeeck Road

Remainder Portion 183 Clayville - Olifantsfontein – objections to changes and development.

By Trevor Stacey
158 Allan Road
Glen Austin
082 8809477
trevor@work.co.za

The issue of real concern for me is the high density of development and the closeness to the Bullfrog pan. I cannot see how we can mitigate the impact of bringing any type of humanity closer to this sensitive area. An environmental impact study will examine what happens to humanity but as we know all classes of humanity have a tendency to go over the top and do unexpected things and the proximity to the pan and the fact that the pan is downhill of the development in question does not bode well for the pan.

We know that the frogs migrate away from the pan if one looks at the roads around Glen Austin to see the number slaughtered on the existing roads.

We Humans have an unfortunate habit of challenging nature in new and creative ways. This development is just too close for comfort, foot and road traffic will increase, fences get brokers (removed) and I can see people taking shortcuts "home" through this very sensitive area.

We also have a reputation for poor maintenance and I would think that this development will be the same leading to more danger to the pan.

Storm water (and associated pollution from poorly maintained hygiene structures) will also cause potential damage to the pan. Why risk it?

Humans wash and recycle – the pan being downhill will be in grave danger from these human settlements and the storm water that will need to be dealt with and maintained.

Development

I am not sure that the developer is obviously keen to generate a profit from development. I am sorry but an excuse such as costs to redevelop the farm must pale into insignificance on the cost of developing a township. The motivation seem disingenuous at least and no reason to change the existing restrictions and zoning. The land could be leased to a real farmer if the current owner cannot or more likely does not want to farm

Surrounding areas and development

The requirement for high density housing also seems to be used as a City requirement? Midrand we are told is the fastest developing suburb in South Africa. There are plenty of sites and development happening to the west of the N1 (Lever road, Kyalami and Blue Hills area) which seem to cater for multi-level/medium density housing. The East is low density and agricultural and provides an industrial belt along the N1 Highway and R101 and then we have low density and green belt for the area and the city to breath. Development should be kept low density around this area in order to balance the overuse of land in the east by Tembisa and Ivory Park.

The area has several wild animals in the area apart from the bullfrogs; bringing humans closer will lead to an even greater destruction of this wildlife.

Traffic

Dale Road and Glen Austin roads are all traffic nightmares at the moment in peak hours with low-density living. How many roads will need to be built to ease the congestion?

Dear Sir/Madam

Subject: COMMENTS FOR THE DRAFT SCOPING REPORT ON THE REMAINDER OF PORTION 183 OLIFANTSFONTEIN (CLAYVILLE X 50) - STRYDOM

The above-mentioned matter refers.

In evaluating the report, the Ekurhuleni Metropolitan Municipality (EMM) considered the following environmental management tools:

Ekurhuleni Environmental Management Framework	<ul style="list-style-type: none"> Ecological Development Constraint Zone: The area is made up of Egoli Granite Grassland. This vegetation type predominantly occurs in Gauteng Province and is partially protected. Hydrological Development Constraint Zone: There are two pans occurring on the proposed site. Geographical Areas: The property falls within C-Plan 2 Irreplaceable site. Environmental Sensitivity is medium to High due to the vegetation cover occurring in the area.
Ekurhuleni Biodiversity and Open Space Strategy (EBOSS)	<p>The said property falls within "Local Open Space" and "Other Natural Open Space" Nodes.</p> <p>"Local Open Space" Node means open space areas that have a distinct character that are meant primarily for the use or enjoyment of specific communities.</p> <p>"Other Natural Open Space" Node means natural areas that should remain as open spaces, but does not constitute nodes or corridors, that should be incorporated in the planning and development of neighbourhoods.</p>
The Ekurhuleni Bioregional Plan 2012	<p>The proposed property falls within "Critical Biodiversity Area 1 (CBA 1)" and "Ecological Support Areas 1 & 2" Categories.</p> <p>"Critical Biodiversity Area 1 (CBA 1)" Category: Areas required to be maintained in a natural or near natural state to meet targets for biodiversity pattern (features) or ecological processes.</p> <p>"Ecological Support Areas 1" Category are natural, near natural and degraded areas required to be maintained in an ecologically functional state to support Critical Biodiversity Areas.</p> <p>"Ecological Support Areas 2" Category are areas with no natural habitat which retain potential importance for supporting ecological processes.</p>

Comments for the Draft Scoping Report on the Remainder of Portion 183 Olifantsfontein (Clayville x 50) - Strydom

3

SS

Based on the above and the information contained in the submitted Draft Scoping Report, the municipality does not have an objection to the report. In commenting on the application, the municipality considered the following:

- The municipality concurs with the specialists' studies identified for the proposed development.
- The proposed site falls within "Critical Biodiversity Area 1" (CBA 1) and "Ecological Support Areas 1 & 2" Categories. Therefore, the proposed vegetation and Giant Bullfrog assessments mentioned in pages 28-29 will establish whether the area is still in its natural state to meet targets for ecological processes or be released for the proposed development.
- The outcome of the proposed engineering service investigation is crucial for the municipality to establish whether the existing bulk infrastructure in the area will be able to accommodate additional load by the proposed development or not. The said report will be circulated to Roads and Stormwater Department for approval.
- The proposed stormwater management plan must be compiled by a stormwater competent professional engineer to the satisfaction of the Department of Roads and Stormwater of the EMM. The said plan will be circulated to Department for approval.

However, the following issues from the report need to be addressed:

- On page 32 of the report, it is mentioned that electricity will be supplied City of Johannesburg. It should be noted that the proposed development falls within the jurisdiction of the Ekurhuleni Metropolitan Municipality.
- It is mentioned in the report that an advert was placed in the Beeld Newspaper. In terms of Regulations 54, Public Participation Process, an advert must be placed in a local newspaper. It is also recommended that as advert be in both English and Afrikaans languages.
- The proposed layout map of the proposed development on the property must be attached to the draft Environmental Impact Report (EIR). The said map must clearly indicate sensitive areas and buffers within the proposed development.
- Traffic Impact Study must be conducted and attached to the draft EIR. The said report will be circulated to Roads and Stormwater department for approval.

Finally, the municipality requests that the draft EIR appended with all identified specialist studies be forwarded for review and comments as soon as they are available. Recommendations made in the said studies must be incorporated as mitigation measures in the Environmental Management Programme (EMPr) to be developed for the management of potential adverse impacts during planning, construction and operational phases of the proposed development.

The requested information in a form of a hard copy and three cds can be delivered to:

Subject: Olifantsfontein development

Follow Up Flag: Follow up
Flag Status: Flagged

Hi Gwen, Hi Jitske,

thanks for the final reports regarding Olifantsfontein development ptn 207 and 183....

In the scoping report for 207 you write on page 24:

"There is vacant land, old mining activities, agricultural land, Olifantsfontein Road and Midstream estate situated to the north of the proposed site."

Old mining activities? I'm not aware of such but since 2009 (9) Interwaste has established a rubble-dump with extraordinary portions along the old sand quarry – it was recently extended and the odour (depending on wind direction) is sometimes so bad, that we only want to leave here...

The suggested tonnage of dump material by GDAARD was extended (changed by whom?). The Interwaste stench is even more intense in the zoned area for your proposed development.

Interwaste shouldn't be there at all as many residential areas around and a rubble dump has a negative impact on the lifestyle and health conditions of the people around (fine dust, bacteria's, bio gas, stench etc., danger for water pollution) as well as the deterioration of property values. As far as I'm informed W. Strijdom has private shares in this dumpsite or leases the land (?). On the other hand he offers the rest of the farm for development for a residential area....

a conflict which results in long-term problems for the people living around a dump-site not maintained in a proper way (we have enough dust and odour as proof).

I'm sending this as this could be a serious conflict zone and the only winner is Mr. Strijdom. In my opinion Interwaste should be closed in this area.

I hope you had a great Easter Holiday,

Elisabeth Hinke

Jitske, I have made comments previously but I am failing to see how the report has addressed some of the issues raised. May you please elaborate on the process that you are following and particularly the next step, ie I essentially want to confirm that there will be a detailed EIA including actual meetings?

Regards,
Cedric Bessit | Function Manager, Roads and Highways
SMEC South Africa

Good day I&AP's

The above matter refers.

The Gauteng Department of Agriculture and Rural Development rejected the Final Scoping that was submitted and requested additional information.

The reasons for the rejection of the Scoping report as well as our response have been addressed in the letter to the Department attached to the Scoping Report.

The amended scoping report is available for review and comment for a period of 30 days.

The amended scoping report has been placed in a dropbox folder and you will shortly receive an invitation to access the folder.

Should you have any comments please provide your comments to our offices in writing per fax (086 606 6130) or e-mail (gwen.theron@telkomsa.net and/or jitske@telkomsa.net) on or before the 24th of April 2015

Kind regards
Jitske

Jitske

Hi Cedric,
Thank you please if you provided comments it will be addressed in the Draft EIA the process now is only the scoping report.
Once you get the Draft EIA you can comment on the reports because at this time the project is in the scoping phase. GDARD required that we send you the report again. it is very cumbersome because there is not that much that changed, but it is a regulation requirement to provide the document to the I&APs.

Best Gwen

Jitske, I have made comments previously but I am failing to see how the report has addressed some of the issues raised. May you please elaborate on the process that you are following and particularly the next step, ie I essentially want to confirm that there will be a detailed EIA including actual meetings?

Regards,

From: Jitske [mailto:jitske@telkomsa.net]

Good Day Jitske,

I have nothing to add to my previous comments which must still apply to this amended scope.

Thanks,

Michele.
